

Service Advisor Role Description

Syed Motors · Document Code: ROLE-02 · Type: role_description · Department: Service

Purpose

This role description defines the responsibilities, key performance indicators and required competencies for the Service Advisor position at Syed Motors.

The Service Advisor manages the customer-facing service journey from reception and complaint capture through job card opening, technician coordination, estimate communication, invoice review, delivery handover and post-service follow-up.

Effective from the first working day of the current calendar year. The document is reviewed annually by the document owner and revised as necessary. Version 1.0.

1. Responsibilities

The Service Advisor is responsible for customer reception, complaint capture, job card opening, technician coordination, cost estimate communication, invoice review with the customer, delivery handover, and post-service call.

Customer reception

The service journey begins with customer reception. The Service Advisor receives the customer and establishes the reason for the visit so the service requirement can be moved into the workshop process.

Complaint capture

The Service Advisor captures the customer's complaint clearly. Accurate complaint capture gives the workshop a usable description of the customer's concern and supports later service activities.

Service Advisor Role Description — Service Intake

1. Responsibilities

Customer reception

The Service Advisor listens to the customer's stated requirement and communicates the next steps clearly. Professional reception provides a clear starting point for the service visit.

Complaint capture

The Advisor records the customer's complaint as part of service intake. The captured complaint provides the basis for the job card and supports communication between the customer-facing and technical sides of service.

Job card opening

The Service Advisor opens the job card after the service requirement has been identified. The job card provides the working record for the service activity and connects the customer's request with the workshop process.

Technician coordination

The Service Advisor coordinates with technicians after the job card has been opened, helping move the customer's stated concern into the technical service workflow.

Cost estimate communication

The Service Advisor communicates the cost estimate to the customer, providing clear information about expected service costs during the service workflow.

Service Advisor Role Description — Service Completion

1. Responsibilities

Cost estimate communication

Cost estimates form an important part of customer communication. The Advisor explains estimated service costs clearly and applies the financial literacy required for invoicing.

Invoice review with customer

Before delivery handover, the Service Advisor reviews the invoice with the customer and explains the relevant completed service charges.

Delivery handover

The Service Advisor handles the customer-facing delivery handover after the service process reaches completion, connecting workshop completion with the customer's return of the vehicle.

Post-service call

The Service Advisor conducts a post-service call after the vehicle has been handed back. The call extends the service relationship beyond the workshop visit and provides a customer follow-up point.

Service workflow

The responsibilities form a connected workflow: customer reception, complaint capture, job card opening, technician coordination, cost estimate communication, invoice review, delivery handover and post-service call.

Role continuity

Information captured at reception and in the job card should support technician coordination, while estimate, invoice and handover stages should remain connected to the original service requirement.

Service Advisor Role Description — KPIs and Competencies

2. Key KPIs

The Service Advisor is measured through service revenue, additional-service attachment, customer experience and repeat-repair indicators.

Service revenue per job card

Service revenue per job card measures revenue associated with service work recorded through job cards and connects service activity with its commercial result.

Upsell attach rate

Upsell attach rate measures the attachment of additional relevant service items to the service visit and indicates how additional service opportunities are handled.

Service CSI score

The service CSI score measures customer satisfaction with the service experience and reflects the customer-facing quality of the service journey.

Repeat-repair rate

Repeat-repair rate measures the frequency of repairs returning for the same or related issue and connects service quality with the effectiveness of the service process.

3. Required Competencies

Vehicle systems knowledge

Vehicle systems knowledge enables the Service Advisor to understand customer concerns and communicate effectively with technicians and customers.

DMS proficiency

DMS proficiency is required for effective use of the dealership management system supporting service operations.

Service Advisor Role Description — Competency Reference and Ownership

3. Required Competencies

Customer empathy

Customer empathy supports the Advisor's ability to understand customer concerns and communicate appropriately throughout the service visit.

Financial literacy for invoicing

Financial literacy for invoicing enables the Service Advisor to understand and communicate invoice information during customer review.

Applying competencies to responsibilities

Vehicle systems knowledge supports complaint capture and technician coordination. DMS proficiency supports job card handling and service records. Customer empathy supports reception, communication and post-service contact. Financial literacy supports cost estimate and invoice communication.

Role Performance Reference

Intake: Receive the customer and capture the service complaint.

Job card: Open the job card for the service requirement.

Workshop: Coordinate with technicians during service.

Cost: Communicate the cost estimate to the customer.

Invoice: Review the invoice with the customer.

Delivery: Complete the delivery handover.

Follow-up: Conduct the post-service call.

KPI Reference

Revenue: Service revenue per job card.

Additional service: Upsell attach rate.

Customer experience: Service CSI score.

Service quality: Repeat-repair rate.

Competency Reference

The required competencies are vehicle systems knowledge, DMS proficiency, customer empathy, and financial literacy for invoicing.

Approval and Ownership

This document is owned by the Service department and approved by the Branch Manager. Questions or clarifications should be directed to the document owner.

Non-compliance is a disciplinary matter under the HR Policy Manual. The document owner is responsible for the annual review and revision of this controlled role description.
