

Users

Sarmad Motors Pakistan (Pvt) Ltd

Purpose

The Users module lists everyone with access to SkillSprint - the single administrator and the twenty employees onboarded for the automobile business scenario. Each user has an employee identifier, a login, a system role (admin or employee), a job role (only for employees), a department, an experience level and a joining date. The system role governs what the user can do in the app; the job role governs which onboarding plan is generated.

Why this matters

SkillSprint personalises every onboarding plan to the individual. That means the system must know who the person is and what job they were hired for before it can generate anything useful. Without at least one job role and one employee, the Plan module has nothing to work with.

Administrator (seeded at deployment)

Field	Value
Employee ID	ADM001
Name	System Admin
Email	admin@gmail.com
System Role	admin
Department	Management
Password (change on first login)	123456789

Employees

Twenty employees representing every major department of an automobile dealership - Sales, Service, Workshop, Parts, Quality Assurance, Finance, HR, Marketing, Operations and Management. Every employee has a default password of **password123** which HR forces the employee to change on first login.

ID	Name	Email	Job Role	Department	Experience	Joining

Field notes

- **Employee ID** - internal identifier, unique per employee, printed on ID card and used for biometric attendance.
- **Name** - full name as per CNIC.
- **Email** - company-issued email, used for login. Personal email is not accepted for admin or employee accounts.
- **System role** - either *admin* (full access) or *employee* (self-service).
- **Job role** - single job role from the Job Roles module. Determines the onboarding plan template.
- **Experience level** - beginner, intermediate or advanced. Affects plan pacing and depth.
- **Joining date** - triggers the due-stage clock (day_1, week_1, week_2, first_30_days, first_60_days).
