

Role Requirement Matrix

Sarmad Motors Pakistan (Pvt) Ltd

Purpose

The Role Requirement Matrix maps each job role to the requirements applicable to it. A row is (role, requirement, is_mandatory). Roles inherit the common employee-baseline (data privacy, info-sec, conduct, safety, onboarding checklist) and add role-specific requirements on top.

Why this matters

The matrix is the bridge between organisational knowledge (Requirements, sourced from Documents) and the individual (User with a Job Role). Without this bridge the AI has no idea which subset of the 20 requirements applies to a Body Shop Technician versus a Fleet Manager.

Assignments (baseline plus role-specific)

Every role inherits the common baseline: R001 Data Privacy, R002 Info Security, R003 Workplace Conduct, R013 Workshop Safety, R014 Onboarding Checklist. Additional role-specific requirements are listed below.

Role	Additional Requirements
Sales Executive	R006, R007, R016, R017, R020
Customer Relations Officer	R018, R020
Service Advisor	R008, R011, R017, R018
Mechanical Technician	R010
Auto Electrician	R010
Body Shop Technician	R010
Parts Coordinator	R019
Warranty Administrator	R008, R011
Quality Control Inspector	R017
Workshop Supervisor	R010, R015
Finance Executive	R004, R019
HR Coordinator	R004
Marketing Executive	R012
Fleet Manager	R005, R019
Branch Manager	R005, R009, R010, R012, R019

Total assignments

There are **107** role-requirement assignments in the matrix, across 15 roles and 20 requirements.

Field notes

- **is_mandatory** - a role may include a requirement as optional (nice-to-have) or mandatory. The onboarding plan flags mandatory items and requires them for completion.
- The matrix supports coverage measurement: a plan can be judged on whether it addresses every mandatory requirement for the role.
- Changes to the matrix (adding or removing an assignment) do not invalidate existing plans automatically; the Policy Impact module measures which plans need regeneration.
