

Search

Sarmad Motors Pakistan (Pvt) Ltd

Purpose

The Search module is a unified cross-entity search across users, job roles, documents, requirements, plans and audit-log entries. Text-based, keyword-scored, permission-filtered.

Why this matters

SkillSprint accumulates dozens of documents, hundreds of requirements and thousands of plan items in the first year. Without cross-entity search, finding anything specific - the plan that mentioned a warranty rule, the SOP a specific quiz cites - becomes impossible.

Entities and fields indexed

Entity	Fields indexed
User	employee_id, name, email, department
Job role	name, department, description
Document	doc_code, name, type, department, description, chunk text
Requirement	req_code, title, description, must_type, priority
Plan	title, summary, module titles, task titles, quiz stems
Audit entry	user, action, entity, notes
