

Reports

Sarmad Motors Pakistan (Pvt) Ltd

Purpose

The Reports module exports operational and audit data as CSV or PDF. Eight report kinds are supported.

Why this matters

Reports are the paper trail the branch manager, HR head, and (once a year) the OEM auditor look at. Every column in every report is source-derived - no computed value has to be trusted from memory.

Report	Contents
Plan Summary	One row per plan - employee, role, generation date, validation status, reviewer
Coverage	Role-by-role coverage against mandatory requirements
Progress	Employee-by-employee overall percent, weak areas, SLA state
Validation Findings	Per-plan findings - check type, severity, item cited, similarity score
Consistency	Two-run comparison outputs for plans that were run twice
Audit	Every mutating action in the last N days
Policy Impact	Superseded documents and affected plans
User Activity	Login count, plans viewed, quizzes attempted per user in the period
